For Immediate Release:

FOUR BHC RHODES' PROFESSIONALS RECEIVE LEED ACCREDITATION

Focus on expanding sustainable portfolio

Four BHC RHODES' civil engineers recently received their Leadership in Energy and Environmental Design (LEED) accreditation from the US Green Building Council. This accreditation distinguishes professionals with the knowledge and skills to successfully steward the LEED certification process for development projects. Only 28 civil engineers in the state of Kansas have earned this credential.

"We are thrilled to offer our customers a thorough understanding of green building practices and principles and the ability to help them with certification through the LEED Rating System. We have a commitment to serve our customers with exceptional service and this was an area of focus to meet their needs", said Kevin Honomichl, President.

BHC RHODES has several sustainable and LEED Certifiable projects in their portfolio including military barracks and complex development in Ft. Riley, KS, Turkey Creek Tributary in Shawnee, KS and numerous drainage detention projects.

BHC RHODES, civil engineering and surveying firm was founded in 1992 and is based in Overland Park, KS. Their progressive work environment and "no problem" service led to their growth and recognition as one of the fastest growing businesses in Kansas City. BHC RHODES has been recognized by Ingram's magazine, The Kansas City Business Journal, Commercial Journal magazine, MSNBC's "Pick of the Week" and Kansas City's NBC News "Business In Action." BHC RHODES has also been awarded Best Places to Work both locally and nationally. For more information visit their web site at ibhc.com.
