Phone Number:	(580) 622-4263

Arbuckle Memorial Hospital is a 51,000 square foot replacement facility located in Murray County. This replacement hospital is a very deserving asset for the community due to the success of being noticed as a quality health care facility for almost 50 years.

Arbuckle Memorial Hospital is one of multiple facilities that BHC RHODES has designed for the Health Facilities Group. The proposed design allowed the existing facility to run under its current stage until the new facility is constructed and opened to the community. Services we provided include: site layout, utility design, grading and pavement design.
