

PROJECT TITLE:

Arrowhead Stadium - Chief's Training Facility High-Definition Surveying (HDS)

Project Location:	Kansas City, Missouri
Scope:	High-Definition Surveying (HDS)
Self-Performed Work:	High-Definition Surveying (HDS)
Construction Cost:	N/A
Project Start Date:	March 2008
BHC RHODES Client:	Intec Construction Co.
Contact Name:	Dennis O' Brien
Phone Number:	(816) 810-3800
Project Owner:	Kansas City Chiefs

The Chief's organization began construction on a new training facility that will include coaching offices, player video room to review game footage and an area open to the public that will display Chief's memorabilia. Once walls were erected they saw visible deficiencies that needed to be corrected but no way to measure the 60 foot high concrete. BHC RHODES was contacted to utilize our HDS. On the ground from a safe distance, our HDS team laser scanned the 60 foot high walls to determine existing wall locations relative to design. Because of the laser scanning, we were able to document the problem and enable a solution that mitigated potential losses and, more importantly, kept the project on an already stringent schedule.
