Phone Number:	(407) 425-2500
Project Owner:	US Army Corps of Engineers
Contact Name:	Debra Porter
Phone Number:	(816) 389-3085

Custer Hill Child Development Center is a one-story building located on Fort Riley military base in Fort Riley, Kansas. The center provides daycare for 198 military personnel children ages six weeks to five years. The curriculum designed was customized to support military families by promoting family morale. BHC RHODES provided civil site design services for this LEED silver certifiable, design-build project. The design services included a site plan, grading and erosion control plans, storm sewer design, on-site utility coordination, and value engineering, which saved the client and owner a significant amount of money. This is one of multiple projects BHC RHODES has helped design to improve the facilities at Fort Riley.
