Eagle River Station is a 600,000+ square foot mixed-use destination development that consists of shopping, dining, entertainment, a hotel, condos, parking garage, and 580 residential units.

BHC RHODES has provided quality civil design services that have led to multiple destination development opportunities from RED Development. Our goal is to make our customers successful and we do this by our commitment to exceptional project management, coordination and communication. Our service on this project consists of site layout and utility plans, storm sewer reports and design plans, and final construction drawings.
