East Parallel Parkway is a redevelopment project of nearly 6-acres of abandoned housing that will have approximately 60,000 square feet of new leasable office space. The new office buildings will have views overlooking Parallel Parkway and Heathwood Park.

BHC RHODES provided a boundary survey, master planning and civil engineering services for this project. The civil engineering services consisted of site layout, parking lot design, grading and erosion control plans, storm and sanitary sewer design, and utility design.
