Phone Number:	(605) 745-3159

Fall River Health Services successfully serves the Hot Springs, South Dakota community and adjoining counties. Services provided at Fall River include emergency, general surgeries, rehabilitation, dietary, and cardiac rehabilitation.

BHC RHODES provided site design services for the new facility. The site design consisted of site layout, site grading and erosion control, storm drainage, utility service connections, public utility extension coordination, a traffic impact study, and permitting assistance. This hospital is one of multiple healthcare facilities the company has designed to assist Hoefler Wysocki Architects, LLC.
