Kansas City's new state-of-the-art soccer stadium is located at The Legends at Village West in Kansas City, KS. This world-class complex will include eighteen soccer fields for national youth sporting tournaments and an office complex scheduled to be under construction by December, 2011. The facilities are projected to host more than 300 event dates, drawing more than 2.5 million attendees to the area. Fans will enjoy the comforts of the new stadium for the 2012 soccer season. BHC RHODES teamed with Populous to assist with local government approvals, utility relocations, utility extensions, public improvements and on-site improvements.
