<b>Phone Number:</b>	(916) 841-8591

BHC RHODES provided engineering, surveying and easement acquisition services on approximately 18 miles of fiber optic cable facility in public and private right-of-way. Surveying included section corner recovery and property line establishment to support the easement acquisition program. BHC RHODES acquired approximately 25 easement of which two went to condemnation. In support to the program, BHC RHODES established the line list through research, developed documents, performed comp sale reviews and assisted the client with decisions on how to handle the challenging owners. All easements were acquired in time to support the construction schedule.
