

PROJECT TITLE:
Liberty Elementary School Site Improvements

Project Name: Liberty Elementary School Site Improvements
Project Location: Liberty, MO
Scope: Site Design & Transportation Engineering Services
Self-performed Work: Site plans and utility plans
Project Start Date: December 2004

BHC RHODES prepared roadway improvements to extend Camille Street from its current point to an intersection of Missouri Highway A. We also verified a survey, prepared site improvement drawings including site dimension plan, site grading plan, site erosion control plan, storm water management plan, storm sewer profiles, site utility plan, site fencing plan, and site details.

Off-site water and sanitary sewer utility extensions were prepared to serve the school including plan and profile sheets, and detail sheets in accordance with the City of Liberty, Missouri's subdivision regulations.
