Local Fiber Optic Cable Maintenance Projects

Project Location:	Kansas and Missouri
Scope:	Engineering, Surveying, Right-of-Way
Self-Performed Work:	Engineering, Surveying, Easements
Construction Cost:	Approximately \$2,000,000 per year
Services Cost:	Approximately \$100,000 per year
Project Start Date:	1995 to Present
BHC RHODES Client:	AT&T
Contact Name:	P.J. McDermott
Phone Number:	(816) 391-5077
Project Owner:	AT&T
Contact Name:	P.J. McDermott
Phone Number:	(816) 391-5077

BHC RHODES has provided engineering and right-of-way services to support AT&T's local maintenance needs since 1995. The scope of services includes engineering, surveying and easement acquisition on various cable routes in Kansas and Missouri that must be moved or lowered as a result of new highway projects or private developments.

BHC RHODES performs research to acquire current property information and then develops the easement document and exhibits. We provide surveying to establish property and easement boundaries, and negotiate with land owners for the original easement and any necessary settlements.
