

PROJECT TITLE:

Main Street Revitalization

Actual Photo

In 2004 the City of Grandview completed a concept plan for improvement of Main Street from the existing downtown business district to 71 Highway. BHC RHODES was selected to lead a team to prepare construction plans for road, drainage, streetscape, landscaping, lighting, parking, and traffic signal enhancements for the first phase of the Main Street Revitalization program. BHC RHODES' tasks included coordination with the public, downtown business owners, Historic Preservation Council, and City officials to develop plans that enhanced the aesthetics and character of this 4-block segment of Main Street. The traffic signals at the Grandview Road intersection will also be replaced to upgrade equipment while matching the new pedestrian scale lighting.

Project Location:	Grandview, Missouri
Scope & Self-Performed Work:	3D Laser Scanning, Engineering Services, Traffic Signal Design
Construction Cost:	\$1,500,000 (estimated)
Project Start Date:	August 2009
BHC RHODES Client:	City of Grandview, MO
Contact Name:	Larry Finley, P.E., City Engineer
Phone Number:	(816) 316-4857
