Phone Number:	(785) 224-1156
Project Owner:	Adjutant General's Department
Contact Name:	Maj. Ron Rousser
Phone Number:	(785) 224-1156

The 778th Heavy Equipment Transport Company (HET Co.) required space to park and store vehicles and equipment. To accommodate this need, the Adjutant General's Department needed improvement and enlargement of an organizational vehicle parking area at their Nation Guard Armory located in Kansas City, Kansas. Extensive geotechnical investigation was needed due to the instability of subgrade materials due to the gravel lot being a closed landfill in the past. BHC RHODES provided civil engineering design services by providing the Adjutant General's Department with conceptual design alternatives to take best advantage of the fixed funding dedicated to the project. The company also provided final design and plan preparation for the chosen option and construction observation services.
