Self-Performed Work:	High-Definition Surveying (HDS)
Construction Cost:	N/A
Project Start Date:	April 2008
BHC RHODES Client:	City of Lenexa, KS
Contact Name:	Tim Green
Phone Number:	(913) 477-7680

The reconstruction of Santa Fe Trail Drive and adjacent Old Town parking lot was accelerated by the City's governing body by a year due to the rapid deterioration of the pavement. The City did not have a design consultant on board and had to have it under construction by mid 2008. The City contacted BHC RHODES to tackle this fast track project based on our successful experience on other challenging, time sensitive projects. The project included complete design survey of the corridor including a high-definition laser scan to limit incursion on the railroad right-of-way. Other aspects included a critical construction phasing to avoid Old Town celebrations, decorative concrete intersection, landscaping/streetscaping replacement, street lighting replacement, and storm water treatment device.
