Phone Number:	(913) 238-2531
Project Owner:	Deffenbaugh Industries
Contact Name:	Darryl Basham, P.E., Engineer Manager
Phone Number:	(913) 238-2531

BHC RHODES provides construction layout and as-built surveys for the construction of new cells, gas wells and utilities for the Shawnee and Olathe landfills. Services include the use of 3D laser scanning, GPS, robotics, and traditional survey methods.

A big time saver is the use of Trimble Link, which allows us to communicate to and from the field crews and the office without leaving the jobsite. It also allows for calibration and surface preparation for the machine control used on the compactors. BHC RHODES is the prime survey consultant for Deffenbaugh. See their video testimony on our web site at ibhc.com.
