

PROJECT TITLE:
Overland Park Residential Street Program – South Park

Project Name: Overland Park Residential Street Program – South Park
Project Location: Overland Park, KS
Scope: Engineering/Architectural Services
Self-performed Work: Street Rehabilitation
Construction Cost: \$3.1 million (estimated)
Design Cost: \$358,000
Project Start Date: Pending
BHC RHODES Client: City of Overland Park, Kansas
Contact Name: Dan Stack, P.E.
Phone Number: 913-895-6028
Project Owner: City of Overland Park, Kansas
Contact Name: Dan Stack, P.E.
Phone Number: 913-895-6028

Overland Park's 2007 Residential Street Program consists of rehabilitating approximately 1.6 miles of streets in the South Lake Park & Mastin/88th Street areas. BHC RHODES prepared plans for the rehabilitation which consisted of a complete reconstruction of the street to include subgrade repair (as necessary), new asphalt and new curb and gutters.

The existing streets will be removed and replaced with a 22 or 20 feet wide asphalt road surface and concrete curbs and gutters. Other improvements will include a 4-foot wide concrete sidewalk on one side of the street, an enclosed storm drainage system to replace the existing ditches and street lights. New concrete driveway aprons will be constructed from the back of the curb to at least the street right of way/private property line.
