The Pittsburg State University Health Center is a new 11,000 square foot project, which is considered one of the campus' capital improvement projects. It is replacing the old facility due to the increase in student enrollment. The new health center will provide the full range of outpatient health services for the approximate 7,100 students.

BHC RHODES provided services consisting of site layout, site grading, and utility service connections for the new student health center. BHC RHODES has continued to provide civil engineering services on other projects for Anderson MacAdam Architects, Inc.
