

PROJECT TITLE:

San Francisco Bay Area Cable Inventory

Project Location:	San Francisco Bay Area
Scope:	Asset Inventory
Self-Performed Work:	Field Data Collection, Data Base Entry, Mapping, Project Binders
Project Start Date:	April 2000
BHC RHODES Client:	AT&T Network Services
Contact Name:	John Ventura
Phone Number:	(213) 787-0031
Project Owner:	AT&T Network Services
Contact Name:	John Ventura
Phone Number:	(213) 787-0031

BHC RHODES performed a full cable inventory of over 220 miles of AT&T's buried and aerial cables that included interpretation of numerous types of design drawings. BHC RHODES performed all field collection and data input into a custom built MS Access data base and MapInfo, the GIS platform. In addition, photographs and manhole butterfly data was linked to the data base and included in 15 - 3-ring binders of the entire Bay Area network. The project took 6 months to complete.
