Schlitterbahn Vacation Village

Project Location:	Kansas City, Kansas
Scope:	Site Planing, Design
Self-Performed Work:	Site Planning, Infrastructure Design
Construction Cost:	\$20,000,000 (Civil Infrastructure)
Project Start Date:	November 2007
BHC RHODES Client:	Berger Devine Yaeger, Inc.
Contact Name:	Robert Campbell, AIA
Phone Number:	(816) 561-2761
Project Owner:	Schlitterbahn Waterparks
Contact Name:	Katherine Fontenot
Phone Number:	(830) 832-2387

Schlitterbahn Vacation Village is a family-oriented waterpark resort. This current project will be the first to leave the state of Texas, which already has three other waterpark resorts. The waterpark island will behold the world's largest tidal wave river. Surrounding the island will be cabins and tree houses which will be used as lodging for families.

BHC RHODES is providing civil site engineering services. The services consist of site grading, paving, sanitary and storm sewer design, street design, and coordination of utilities. This is one of multiple destination projects we have helped design for Berger Devine Yaeger, Inc.
