<b>Phone Number:</b>	(913) 993-8515

Shawnee Mission South High School, home of the Raiders, is one of five high schools in the Shawnee Mission District. The facility is over 40 years old and has more than 1,500 students enrolled. With age and use by students over the years the school was in need of several improvements.

BHC RHODES provided services for site and sanitary improvements. These improvements included site plans, sediment and erosion control plans, storm water plans, and site utility plans. This is one of the many improvement projects the company has helped design for the school district.
