Phone Number:	(913) 573-5700
Project Owner:	Unified Government of Kansas City/ Wyandotte County, KS
Contact Name:	Bill Heatherman, P.E., County Engineer

The State Avenue Improvements in Kansas City, Kansas include pavement rehabilitation and reconstruction of curb lines and center median from 73rd Street to 82nd Street. State Avenue is a six-lane divided arterial street with many commercial driveways and center median breaks along the project limits. This project includes an access management study to evaluate possible reconfiguration or reduction of median breaks along the study area. The design includes coordination with future State Avenue Bus Rapid Transit project. BHC RHODES is providing project management for the access management study and civil engineering design, including traffic engineering, survey and construction inspection.
