Contact Name:	Dennis Meier, Associate Executive Director
Phone Number:	(816) 587-4100

Synergy Services is a local facility for a not-for-profit housing and counseling service for the at-risk youth of the Kansas City area. The facility included a remodeled existing medical office building and an addition of a stand alone group housing facility.

BHC RHODES provided services consisting of site grading, erosion control, site layout, storm sewer drainage and detention design, post-construction stormwater quality, utility service connections, and project permitting assistance for our client. The designed bioretention basins to filter out the stormwater gave the company an opportunity to participate on a LEED Silver certifiable project.
