Phone Number:	(913) 696-1601

Vince and Associates is a clinical research facility for research on multiple health issues. They became one of the leading U.S. clinical trial services companies since formation in 2001. They specialize in central nervous system research and conduct overnight and outpatient studies for sleep disorder research.

BHC RHODES provided services on the facility with site design plans, erosion control plans, storm sewer drainage analysis, and existing parking lot improvements. The company also helped with the site permitting which included COE permitting and State of Kansas DWR permitting.
